indium
Make Technology Work

Out-of-the-box solutions **are no longer enough.**

Today's need of the hour is to shorten product development cycles. With cloud computing and new technologies paving the way, our end-to-end development services help reduce the time-to-market by as much as 30%. Indium helps you meet stiff deadlines, customer demand and need for innovation. Indium Software's team of full stack developers take care of end-to-end development of both the front and back end.

Product Development Services

Product Re-Engineering
- Architecture Analysis
- Platform re-engineering
- Performance analysis and tuning
- Profiling & Monitoring

Product / Application Development
- Cloud and On-premise
- Full Stack, MEAN Stack & MERN Stack
- Technology Evaluation
- Solution Architecture blueprint

Low Code Development
- Mendix
- Alpha Software

Mobile App Development
- End-to-end mobile app development
- Custom iOS/ Android OS Native app development
- Cross platform development

Blockchain Solutions
- Blockchain Development
- Protocol Research
- ICO Platform Development

Legacy Migration
- Assessment and Planning
- Database & Code migration to latest technology stack
- Technology and Data migration

SaaS Enablement
- Architecture Analysis and Design
- Migration strategy
- On-Premise to SaaS migration
- Deployment, Maintenance & Support

Indium Advantage

End-to-End Digital Capability
Our product development expertise leverages Big Data, Analytics, Data Visualization, Cloud, and IoT capabilities to provide integrated end-to-end services from Consulting, Solution Architecture, Design, Delivery, Optimization, and Maintenance

Shorter product development cycles & Agile Development Framework
Deep engagement with the customer to understand the requirement, the objective and add value through our experience. Constant review for course correction and market relevance.

Blockchain Expertise
Over two years of expertise in Blockchain development including experience in platforms like Hyperledger and Ethereum

Complete Product Development
Developers take care of end-to-end development of the layers like presentation layer or the front end; the business logic layer or the back end part that deals with data validation; and the database layer.

Low Code Development Capability
Indium is one of very limited set of service providers in Low code development platforms like Mendix & Alpha Software

Technologies

UX/UI

AngularJS | Angular 6 |PHP | Laravel | Ionic | ReactJS | Bootstrap | Balsamic | Material UI | Angular Material | Primefaces | PrimeNG | MdBootstrap | Ruby on Rails | GO

Java Technologies

Core Java | Spring MVC | Micro Services | Hibernate | EJB | JPA | JSP | Struts | ReactJS | SOAP | RESTful | Node.js framework

Mobile

iOS - XCode | Objective C | Swift | AppKit | WatchKit | ARKit
Android - Java | Kotlin | Android Studio | Android NDK
Cross Platform - React native | Xamarin | Ionic | PhoneGap

Cloud

AWS - API and Lambda Services | EMR | Elasticsearch | RDS | Redshift | Kenisis | S3
Azure - Blob | ML Studio | Azure Data Factory | Azure Data Lake | Google App Engine | Google APIs

Blockchain

Platforms - Hyper Ledger | Bitcoin Core| Ethereum | R3 Corda
Services - Smart Contract | Token Generation | **Tools -** Go Lang | ReactJS | Ethereum – Solidity &Metamask | Google Device Locator | Eddystone | Web Beacon | Hyperledger Fabric | Hyperledger Composer

Low Code Platforms

Mendix, Alpha Software

Domain Capabilities

- Banking & Financial Services
- Healthcare
- eCommerce
- Education
- Technology
